Quick Shipment

Fixtures needed right away? No problem! Check out our **Quick Shipment** offer, where you will find products available almost immediately! Thanks to optimized processes, fixtures are shipped in just 2-5 business days!

Check the available models and colours from the QS offer on our website (www.aqform.com/QS).

Our standard product range is shipped within 15-20 working days from the confirmed order.

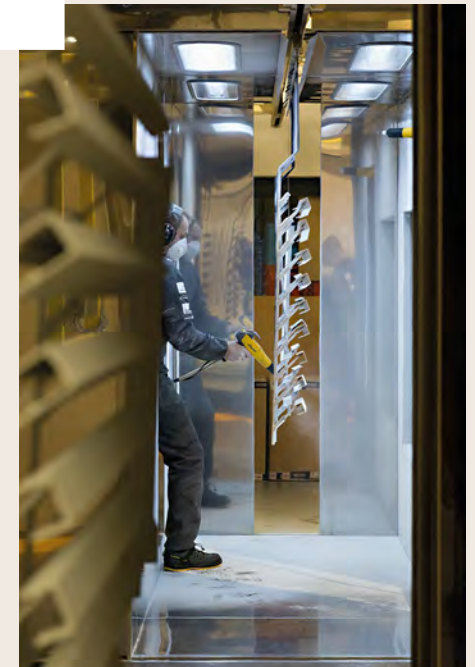

Colours

Classic white & black, or perhaps intriguing terracotta or taupe? Our fixtures invite you to play with colours! In addition to the standard palette, upon request we are able to produce them in any shade from the RAL or NCS palette. Moreover, products that consists of multiple elements can be prepared in different colours.

Local production

We design, test, and manufacture our luminaires in our factory located near Krakow in southern Poland.

Our Research and Development Centre, dedicated to lighting, spans nearly 3,600 m². In 2024, we completed a new building with over 7,000 m² of warehouse and production space to enhance the efficiency of our production process.

Practical information

Stylish & easy to install

This catalogue showcases a carefully selected range of modern, stylish luminaires designed for quick and easy installation—often taking just minutes for skilled hands. Convenient mounting saves time and effort, making life easier. This catalogue highlights a curated selection of products and their specifications. For more options, visit our website.

Essential tools for smooth installation

To help you achieve fastest results, we've included an overview of the tools that are most useful for mounting our luminaires. Having these essentials on hand ensures efficient and trouble-free installations.

- Hex screwdriver 1.5 + 2 + 2.5 *
- Small flathead screwdriver
- Small Phillips screwdriver
- Voltage tester
- Wire cutters
- Cordless drill, magnetic bit holder, Phillips bit
- Hammer drill, hammer drill bits
- Set of wall plugs

*preferably not in the L-shape

La Muse de Marcel, Brugge

TRIBA midi E27 suspended track custom project

Tracks

Lighting tracks are very flexible solutions. Their main advantages are powering many luminaires from one point and the ability to easily change the arrangement and number of luminaires. They are perfect for shops, galleries and restaurants, but also for residential interiors.

MULTITRACK models are distinguished by their simple form and safe voltage of 48V inside the track. They can be mounted not only on the ceiling, but also on the wall, within easy reach.

MULTITRACK offers a surface-mounted version with a lower track height. It can be suspended. There is also a recessed variant. In both cases, the frame adapters are flush with the edge of the track. Higher versions: surface and trim or trimless recessed are solutions in which the linear fixtures are completely hidden within the track.

3F tracks are very popular and universal systems. They are available in a surface mounted version (including accessories for suspension), as well as a recessed. 3F tracks are also available in DALI version.

■ DOBRE
ROZWIĄZANIE

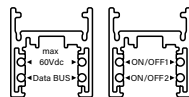

MULTITRACK

Safe voltage 48V & wall-ceiling arrangements

The safe voltage inside the MULTITRACK and variety of mechanical and electrical connectors allow to use the system within arm's reach and wall-ceiling transitions. The simple and refined form remains elegant even at very close proximity. In all MULTITRACK systems, luminaires can be connected to two circuits using two power supplies (except plug-in power supplies, which power only one circuit).

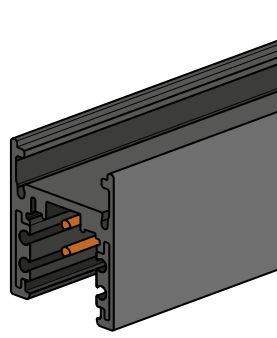

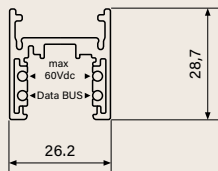

48V | max 2 metres in one piece | MULTITRACK is compatible with both ON-OFF (one or two circuits) and DALI. To create second circuits, use DALI wires as ON/OFF circuits 2 | Can be safely installed on walls | requires 48V power supply

Easy to complete

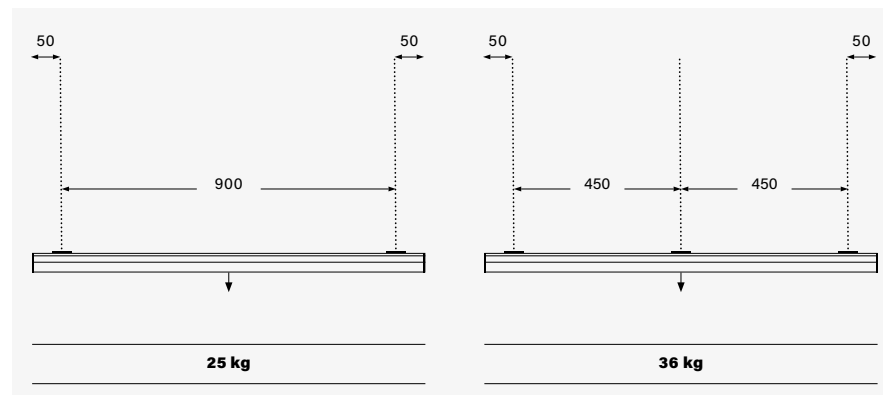

The set can be designed in 4 simple steps

1. Select the track

tracks	colour	catalogue number
surface 1000mm	black	SMCM1DAB
	white	SMCM1DAW
surface 2000mm	black	SMCM2DAB
	white	SMCM2DAW

Maximum load

2. Choose the appropriate connector

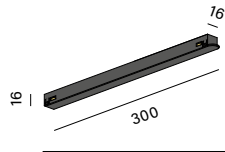

product	colour	catalogue number
M MULTITRACK straight connector		SMCSU000
M MULTITRACK electrical straight connector universal	black	SMASUDAB
	white	SMASUDAW

product	colour	catalogue number
M MULTITRACK mechanical connector „L” surface/suspended	black	SMCLU00B

	white	SMECH00W

product	catalogue number
ADDITIONAL OPENING FOR power feed	810320

Extra

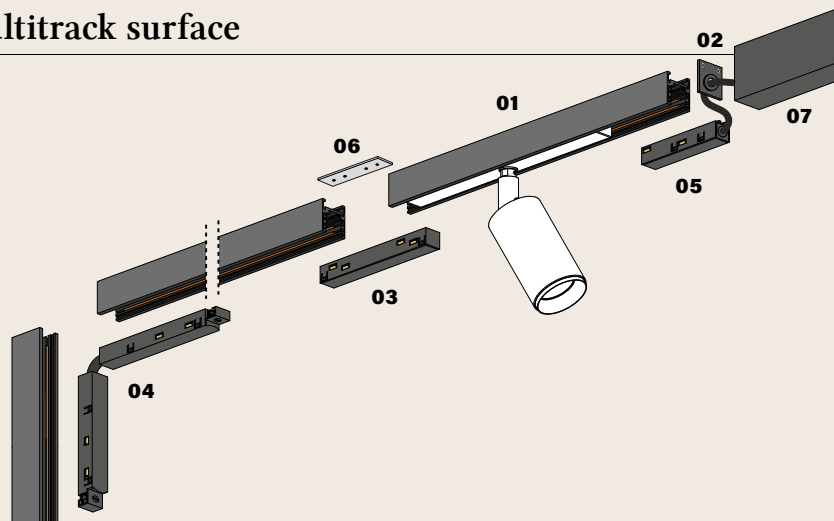

product	colour	catalogue number
M MULTITRACK AQsmart interface adapter	black	SMAMUDBB
	white	SMAMUDBW

Multitrack system can be controlled wirelessly. For wireless control AQsmart module is needed for each group of luminaires connected to the track. Regardless of AQsmart module, the luminaire must be in the DALI version. One device can control up to 64 fixtures, which can be divided into a maximum of 8 groups.

Example of track set

Multitrack surface

	product	catalogue number
01	M MULTITRACK profile surface black	SMCM_*DAB
02	M MULTITRACK end cap with opening surface/suspended black	SMECH00B
03	M MULTITRACK electrical straight connector universal black	SMECH00B
04	M MULTITRACK electrical flexible connector universal black	SMPFUDAB
05	M MULTITRACK power feed universal black	SMPCUDAB
06	M MULTITRACK straight connector	SMCSU000
07	M MULTITRACK canopy with power supply EM 100W 48V surface black	SMCMMPBB

TIP: within one track part of luminaires can be on while other stay off at the same time!

Within one MULTITRACK, it is possible to connect luminaires for two circuits, provided that two power supplies are used. In order for the fittings to operate on two circuits, some luminaires need to be selected with the control: ON/OFF - the second circuit.

HIGH MULTITRACK

Multitrack features + more space

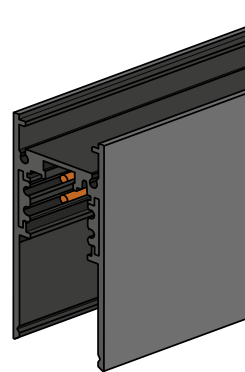

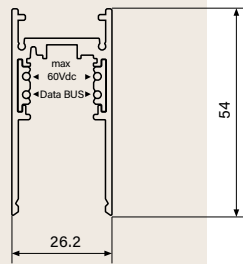

A greater track height means more concealed mounting elements. In the HIGH MULTITRACK system, the mounting component of most luminaires is completely hidden from view, and some luminaires allow the entire lighting element to be flush with the ceiling.

48V | max 3 metres in one piece | ON-OFF (one or two circuits) | DALI
Can be safely installed on walls | requires 48V power supply

3F TRACK

With the use of track systems, one can easily change the number, location and even the type of luminaires installed indoors. It is possible to adjust the interior lighting without making additional changes to the ceiling structure or electrical installation. Track systems are made of aluminum profiles varnished in selected colours. The inside copper wires are placed in a guideway made of self-extinguishing polycarbonate, which also insulates the wires from the aluminium body. Fire resistance class – V-0.

The track can be cut to given dimensions at the installation site. The cut surface or copper line of standard 3F tracks does not require bending or any other special treatment after the cut. Copper lines of the 3F DALI track need to be trimmed after the cut.

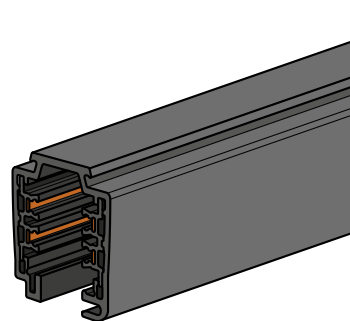

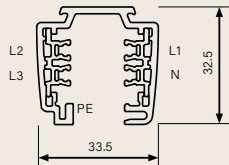

230V | max 3 metres in one piece | ON-OFF (three circuits) | DALI
