Collection designed with passion: new glance at glass

The **Modern Glass** collection is mainly a history of searching the archetype form of light. Shape, although seems to be friendly familiar, still brings fresh view. – *At first we were observing the play of light on the glass. It turned out that the most interesting effects can be obtained by using simple forms like a tube or a cone. Glass with proper thickness allows light to gently flow on the surface of the lighting fixture.* – says Jakub Jand'ourek, one of the designers.

The Modern Glass line was created in collaboration with Czech design office DECHEM. This collection was awarded with *must have* title during Lodz Design Festival 2017.

This year the variety of glass shades and different mounting types is extended with **new wall luminaires and compositions of hanging lamps.**

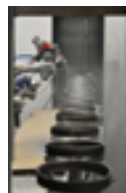

DECHEM studio — Michaela Tomiskova, Jakub Jand'ourek

When modernity meets classics

Modernity meets classics in Modern Glass collection. Shades are hand-made according to the original, over a century old technology. The craftsman's touch gives each lampshade its own unique character.

The luminaire interior is made of aluminum elements of a minimalist form. Three different types of light sources allow to achieve various lighting effects.

Sophisticated decor

Glass is one of the most graceful materials that can be used to help the luminaire become a home decor. That is why, in cooperation with the Czech design studio DECHEM, we have created the Modern Glass collection. The interior of those fittings is made of minimalistic aluminum elements, while the exterior – hand-made lamp shades – is made of high quality Czech glass. Thanks to that Modern Glass offers not only practical luminaire, but also a particular piece of art.

You can easily choose between available shapes of lampshades, glass textures, finishes and even types of light sources. Each combination will give a unique effect.

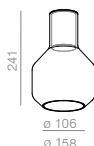

TUBE

BARREL

FLARED

Discover Modern Glass

handmade glass

3 glass shapes (Tube, Barrel, Flared)

2 glass textures (plain and rhomb)

2 glass colours (transparent and smoke)

3 mounting types: surface, suspended and **new** wall luminaires

new hanging compositions

3 types of light sources = 3 light emission types

5 basic colours of interior part
